SUMMARY

Backend Software Engineer with 2+ years of experience building scalable APIs, enterprise integrations, and backend systems using Python, Django, and FastAPI. Specialized in financial integrations, data synchronization, and automation solutions for global Sales Tax, VAT, and GST compliance.

SKILLS

Language & Frameworks: Python, JavaScript, TypeScript, Django, FastAPI, Django REST Framework, NextJS, TailwindCSS, SQL, HTML/CSS

Tools: Git, Redis, Celery, Docker, Cursor, Claude, MCP Servers, Agentic workflows, Atlassian

PROFESSIONAL EXPERIENCE

Integrations Engineer — [Kintsugi AI](#), Remote (US)

May 2025 – Present

AI-native sales tax automation platform serving SMBs across the US, Canada, and Europe.

- Designed and implemented production-grade integrations with **QuickBooks, NetSuite, Shopware, Maxio, Airwallex, and Intuit IES**, automating financial data ingestion for tax compliance workflows.
- Built resilient synchronization pipelines handling authentication, pagination, schema normalization, and external API inconsistencies across multiple financial platforms.
- Collaborated with tax researchers and platform engineers to improve address validation and tax eligibility determination across the United States, Canada, and international jurisdictions.
- Implemented validation, retry strategies, and structured error handling to improve the reliability of third-party API integrations.

Software Engineer — [Qtec Solutions Limited](#), Remote (BD)

Jan 2024 – Feb 2025

Mahfil — Halal Video Streaming Platform

- Implemented backend Ad System serving 600k+ users; added caching that cut latency by 55% and improved server efficiency by 60%.
- Designed REST APIs supporting administration features built with React and Next.js.

Zilla Sanitary — Inventory Management Platform

- Built internal inventory and accounts management app; resolved N+1 query issues across the sale, product, and accounts report modules.
- Deployed beta server on AWS EC2 with nginx and gunicorn.

Amal Education — German EdTech Platform

- Built backend APIs with async support; implemented a Google Drive-style folder upload mechanism.
- Deployed beta server on AWS EC2 with nginx and uvicorn.

PROJECTS

- Traffic Pass — Police vehicle inspection system streamlining checks across multiple locations.
- Traffic Complaint — Citizen complaint portal with Gemini API for image/video-based traffic crime reporting.
- E-Commerce Website — Full-stack online clothing store with product and order management.
- E-Ticketing — Online bus ticket booking system with seat collision handling.

COMPETITIVE PROGRAMMING

Solved 500+ problems on LeetCode, CodeChef, HackerRank, Toph, and Codeforces. ICPC 2023 Regional Finalist; Code Samurai 2022 Finalist; ITVerse Datathon 2023 Finalist.

EDUCATION

Diploma in Engineering (Computer Science & Technology)

Compact Polytechnic Institute, Feni

CGPA: 3.66 / 4.00

Aug 2019 – Jan 2024
